

FOR IMMEDIATE RELEASE

Bullrock Solar Has Begun Construction on a New Solar Array in Addison, VT

Shelburne, VT- Gregg Beldock, CEO of the Bullrock Corporation and Bullrock Solar announced that construction has begun on a 730kW ground mount solar array at 8683 Route 22A in Addison, VT. The new solar field will consist of 2,040 panels and will be set on 5 acres of an under-utilized crop field. Bullrock Solar President Andrew Thomas says, “We are looking forward to completing this project in March 2019.” He goes on to say, “Our plan is to work on installing this array throughout the winter and in spite of the weather we’ll be up and running on schedule.” Bullrock Solar, a subsidiary of the Bullrock Corporation is one of the leading solar companies in the region. The solar company offers a unique list of vertically integrated solar services, as well as award-winning construction expertise. Bullrock solar has created and developed a vast portfolio of solar projects, which include: rooftop arrays, car ports, and ground mount solar fields, while also specializing in everything from planning, installation, finance, maintenance, and monitoring to facility management.
